

Learning the table that you are stuck on!!

Which times table are you having trouble on. Write it out below. Ask your parents to help you if you want.

Now.....

Tick or highlight all the sums you already know.

Write the ones that you need to learn on pieces of card. Write them clearly in felt tip pens.

Decide how you are going to learn these sums.

You could:

- Ask a friend how they know the answer
- Display the cards where you will see them often (on your desk, on your pencil case, on the fridge at home, etc....)
- Work out a strategy relating that sum to one that you do know
- Relate the numbers to another number (age, phone number, house number etc...)
- Find another way

Now set yourself some targets:

These are the sums that I am going to learn:

| | |

I am going to remember them by:

Write each sum and how you are going to remember the answer to that sum)

I am going to learn them by this date:

..... has agreed to test me on this times table

My reward for learning them all really well is going to be
